Election Turnout Analysis Worksheet

Instructions:

1. Look at the voter turnout out rate for your county over a period of primary and general elections. Record the number of registered voters, voters voting, and turnout percentage for the following elections:
    a. 2020 Primary Election (Presidential Election)
    b. 2020 General Election
    c. 2022 Primary Election (National and State)
    d. 2022 General Election
    e. 2023 Municipal Primary Election (Local)
2. Write a summary of your analysis of the turnout rates. In the analysis, speculate on the why of the trends.

Year and Type of Election	Registered Voters	Voters Voting	Turnout Percentage
2020 Primary Election			
2020 General Election			
2022 Primary Election			
2022 General Election			
2023 Municipal Primary Election			

Questions:

1. What trends, if any, exist?

2. Write a summary statement that summarizes what you have discovered.
